

STATEMENT OF PURPOSE

RS22748

This legislation will allow the state department of education to accept revised data for salary-based apportionment calculations after October 15th. The department will do so in cases where a school district had attempted to hire a teacher prior to this date, and would otherwise lose funding due to the application of the "use it or lose" provision for instructional staff funding.

FISCAL NOTE

Since the state funding formula for public schools is not appropriated based on an assumption that school districts will turn instructional staff funding dollars back to the state, there is no impact to the state General Fund.
